

# RESUME

## Profile

Design is my passion. Being creative is my lifestyle. Organization and efficiency are my standards. My wife is my love.

## Experience

### *Freelance Designer; Las Vegas, NV — 2005- Current*

I have been designing since I was in junior high and I was printing T-shirts for my brothers high-school band. Soon people were asking me to create web sites and logos for them. I began to realize that what came natural to me, and frankly a joy, was of great worth to other people. Since I started to take designing seriously I have worked on numerous different projects at peoples request. Mostly by word of mouth.

### *Sales, R.C. Willey; Henderson, NV — 2004- Current*

My 'day job' is working the sales floor at the all in one home furnishing store called R.C. Willey. I sell electronics and appliances. This job has provided me with a wide understanding of the different types of people out there and how to tailor my "pitch" to meet their needs. This and other sales skills are very helpful while working with clients.

### *Sales, Firstline Security; Sacramento, CA — 2004-2004*

At this summer job of door to door selling security systems I learned many great personal skills. Among the highest of these was he ability to loose all inhibition and ask for the sale in any circumstance, to close. To win.

### *Missionary, The Church of Jesus Christ of Latter-day Saints; Manchester, England — 2002-2004*

As a missionary for my church I traveled the beautiful countries of England and Wales. It was great time in my life as I learned many lessons which make me who I am today; a self sufficient worker, problem solver, communicator, and leader. In this position I had the responsibility of up to 25 others working and reporting to me.

## Education

College of Southern Nevada; Las Vegas, Nevada — Graphic arts, currently attending.

## Skills

I am always the most skilled in all of my classes as I attend school for my graphic arts degree. I am more than gifted with most of adobe's creative suite. I am strong in Photoshop and Illustrator. I can work my way around flash sufficiently, and I can use InDesign and Dreamweaver. I know and can write HTML by hand.
